

ARABIC REVOLUTION WAVE

During the last five months, North Africa has suffered aggressive changes. A revolution movement has spread like wildfire. After analysing the situation, all these countries have had a lot of coincidences.

Firstly, the dictatorship has been their government model, involving in the high level of power, to dictator family. Obviously, the corruption was present in any government action. All of these leaders have been in the head of power for many years.

Secondly, the Islamic precepts were used as a control tool. Every negative fact provided from Occident, from non Islamic followers. The guidance of the leader never was discussed. The State had controlled people under governmental police procedures.

Thirdly, all of them have naturally riches. The reserve or production of petrol or natural gas has been the biggest reason of their wealth. The interest of the most important countries in the World is moving with this main topic.

In fact of young people has attacked this model of life has been the logical consequence to the power pressure. Once the gunpowder started to fire, to endorse a change was a time question.

Actually, another coincidence in all of them is the progression to democratic governs.

Comentario [19]: Noun: governments

Finally, the great powers must be proactive with this situation. The democratic consolidation of them must be the main objective of International Organizations. The result could contribute to reach more stability to our World, not only in the energy resources market but also, regarding social environment, in the relationship with Islamic culture.

Comentario: Analiza una situación pero no especula tal y como se indica en la pregunta.

Como puede leer en las notas, no he podido entender algunas ideas que expresa. Relea sus redacciones para evitar escribir frases sin verbo y que, por tanto, sean agramaticales.

En esta redacción se dedica más a relatar hechos (tarea de nivel 2) que a analizar con detalle. En el nivel 3 necesita demostrar que controla la gramática básica, pero esta redacción contiene muchos errores en el uso de preposiciones, en el orden de palabras y el uso de los tiempos verbales.

El estilo es adecuado y usa vocabulario abstracto, aunque resulte repetitivo en ocasiones. Necesita mejorar el vocabulario. La expresión "los cambios agresivos" que menciona en el primer párrafo no tiene mucho sentido en este contexto.

Nota: 2.
