

## EDUCATIONAL LEVEL IN THE SPANISH SCHOOLS REQUIRES A CHANGE

Education is the best legacy that we can provide to the future generations and so that, a key factor in the development of our society. Some recent surveys show us that the educational level in the Spanish schools is getting worst and worst in last time. This situation potentially has terrible consequences for the future of our people and our country and it must be urgently corrected if we want a better live for our sons.

There are a heated debate about this issue, but surveys, and reality, show us that it is necessary to redefine the goals and the procedures of the educational system in the schools in order to improve the quality of our young people and to prepare them to affront their future working live with better tools that they have at this moment. The high rate of unemployment, the new technological exigencies, the better preparation needed to affront the working live, the human values and the general culture are keystones and references that we must take into account in order to reorganize the educational system to achieve a better and useful development of our children and our society. I believe that at present in our schools there are a lack of values and a bad definition of educational procedures that require urgent changes to improve the preparation of students.

It is widely accepted that education is not only responsibility of the schools, also family and society, as references of our particular style of live, plays a key role in the process. So that, measures in different ways must be taken to improve the quality of the system. \*\*\* For instance, in the schools we must define a program that provide to the students preparation enough in the use of new

technologies, a useful level of English, and furthermore link the procedures with the future necessities in the working live. On the other hand personal principles and values must be learned into the families, permanent reference of the particular style of life. In addition to these cultural perception must be taken in the day by day life with appropriate participation of the media and officials statements.

In conclusion, if we want provide a appropriate legacy for the future generations, essential for their development, it is necessary, and urgent, to improve our educational system taken into consideration that schools, families and society must rethinking their goals and their roles to offer the adequate tools for the preparation of our people with the goal to incorporate our young people to the active working live with the best preparation that we would be able to provide them.

Comentario: Hace un análisis detallado de la situación pero no especula de la forma que se indica en la pregunta.

Aunque he dejado de corregir al llegar a las 280 palabras he leído toda la redacción. La argumentación es válida pero es muy repetitiva tanto en ideas como en vocabulario. Necesita ser más preciso en el uso del vocabulario.

Como puede leer en las notas, no controla muchos aspectos básicos de la gramática (sobre todo en la concordancia, las formaciones verbales y el uso de las preposiciones).

Nota: 2. Para alcanzar el nivel 3 debe demostrar que controla la gramática básica. En esta redacción ha usado vocabulario abstracto, pero necesita evitar las redundancias y ser más concreto y preciso al expresar sus ideas.
