

EXERCISE 2

It is a fact that, in nowadays, we are having got a big problem with education up to a point cultural or educational level has drastically gone down.

First of all, it is important to mention I finished mandatory educational studies twelve years ago however, in my opinion, lots of changes have been made. For instance, students don't receive formation about combinatory mathematics, global history... if they don't want to do so. Besides, only have you to go a college and take a seat in a classroom and you fast realize students talk to their teachers as a colleague not like an authority or simply with education forms. In a word, I am inclined to believe that a serious problem is attacking to our society and we are watching to other place.

As far as I'm concerned good educational levels is reached by two main steps; not only is this a problem affecting to schools, colleagues and institutional centers in general, but also is the problem in each home of our country. It is widely maintained that parents have to spend time in their children. On the whole they have to play, have dinner, do homework....to put it simply they have the obligation to take part in his children education. By other hand, this society should change its mind and remember the traditional values and forget a little of "modern values" such as freedom of movement, of thinking...and all the other wrong rights, always from my way of thinking, which don't help the situation can be improved.

Comentario [5]: This is a very informal way of explaining something. Better: Moreover, if one has a chance to seat in a school's classroom, one realizes quickly that students talk to their teachers as if they were colleagues, and not as figures of authority. Students sometimes speak without manners.

Comentario [15]: Sentence structure: which don't help to improve the situation.

To put in briefly, we have a problem and between all of us we have to believe a change is possible and following this line, facing this fact, we will be able to make a better future for our young academics.

Comentario: Aunque defiende su opinión lo hace con un estilo demasiado informal y cometiendo demasiados errores. Ha olvidado especular tal y como se solicitaba en la pregunta.

Los verbos frasales no se suelen utilizar en lenguaje culto y formal o, al menos, se usan en contadas ocasiones. Tampoco es común usar puntos suspensivos.

Como puede leer en las notas he reescrito algunas oraciones porque se entendían con dificultad. Necesita mejorar la construcción de frases para que suenen más naturales.

Nota: 2. Necesita mejorar el uso de vocabulario, la construcción de oraciones y, sobre todo, demostrar que domina la gramática básica. En el nivel 3 no se pueden cometer errores de concordancia.
